## FREEJET 320 PLUS TX

The FJ320plus TX is a complete textile printing solution that offers simple operation and a high grade of flexibility. The specialized textile inks can be used to print directly on cotton and other fabrics. After printing, the ink is fixed using a simple heat press or a drying tunnel. For standard production the FJ320plus TX comes with a 310x450mm fixture for T-Shirts.

The machine is equipped with White and CMYK ink that allows you to print on black, coloured and white garments. The printer automatically produces multi layer jobs and signals the end of a job acoustically.

Our solution includes the sophisticated Freejet RIP for Windows which simplifies production using integrated ICC profiles, flexible printer control and an intuitive user interface. The strength of the Freejet RIP is the capability to automatically generate the white base, which eliminates time consuming image manipulations.

Item	Specification
Printing method	Inkjet with piezo print head
Printing size	Max. A3+ (310 x 450mm)
Dimension	640 x 1065 x 460mm
Weight	70kg
Printing direction	Bi-directional or Uni-directional
Printing speed	20-30 bright T-Shirts or 8-12 dark T-Shirts per hour
Maximum height of textiles	50mm
Interface	USB 2.0
Printing resolution	Up to 1440 x 1440 dpi
Ink	8 colour (C,M,Y,K plus 4x White) / waterbased pigmented
Precoating	Yes, if printing with white ink
Ink supplying method	Open ink tank system (200ml per colour)
Nominal voltage / consumption	AC 230V / 110V , 25W
Height adjustment	Auto sensing using an optical sensor
Software RIP	RIP software for Windows (2000, XP, Vista) with prepared print environments
Environmental condition	Temperature 10-35°C / Humidity 20-80% non condensing
Fixture	Standard plate 310 x 450 mm
Options	Garment Frames: Standard, Polo, Mini

Standard

Polo

with Shirt

Mini

Power Sprayer
